

# BOSK DESIGN BANDS

## STANDARD

Standard panel sizes (1200x2400, 1200x600 and 600x600 and the associated ceiling tile equivalents) with standard perforation patterns. These standard panels are available as .DWGs on our website for download. Any panels cuts are done on site as required. These will be sent to manufacture upon a confirmed order. 20 working days lead time (assuming veneer is available).

Required information:

- Perforation pattern
- Size
- Substrate
- Laminate colour
- Laminate finish

## CUSTOM

**Altered standard patterns/ nested panels.**

Any alterations and cut panels are clearly communicated and handed over as drawings that can easily be configured for manufacture. All information to be clearly provided. T&R will not issue additional shop drawings for this level but drawings are produced for sign-off (one set of small corrections allowed before incurring design costs). Pricing is based on full panels (or parts thereof) with a small premium. 20 working days lead time from drawing signoff (assuming veneer is available).

Required information:

- Perforation pattern
- Alterations to the standard sizes and perforations clearly communicated
- Substrate
- Laminate colour
- Laminate finish

## BESPOKE

**For complicated ceilings, walls and bespoke patterns/cutouts.**

This offering is available for complicated and bespoke patterns and designs. This process may involve Flexijet measure, shop drawings, perforation pattern edits to produce panels with joinery precision. This ensures ease of installation and allows for complex designs. There will be an extended lead time required; 20 working days from receipt of all information and working drawing signoff (assuming veneer is available) so the lead time is significantly extended. Work is charged at an hourly rate.

Required information:

- Design intent and perforation pattern clearly provided and communicated
- Substrate
- Laminate colour
- Laminate finish
