

5 Line Laser

The Ultimate Multi-Liner

For the ultimate levelling, the IMEX LX55, five line laser with four vertical lines and one 360° horizontal line offers the best in sharp, accurate interior line set-out. The unique full 360° horizontal line allows for the instrument to be set up in any part of a room.

Combined with this is the option of a detector for outdoor mode up to 50m, making this the most versatile all round laser available. With its rugged build and high accuracy this instrument is specially suited to commercial building projects.

Used for

- All standard line laser tasks of smaller models
- Commercial fit-outs
- Outdoor tasks (with optional detector) including decks, concreting, layout, trenching, fencing, pool set-up.

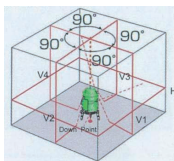

LX55D Accessories

- Optional detector for 50m outdoor use
- Tripod
- Laserpole

Inclusions

- Laser glasses
- Target plate
- Hard carry case
