CARE AND MAINTENANCE GUIDE

BOSK PANELS

T&R products are designed to be durable, hardwearing and low maintenance. Occasional cleaning and maintenance will extend the life of the products and make any cleaning task less labour intensive. Bosk Panels are easy to care for and can generally be wiped clean. See below for detailed care of stained and soiled areas.

NB: Bosk Panels finished with melamines and veneers should be treated with care, and any cleaning products should be used with this in mind. Bosk Panels carry a 10 year warranty, though warranty is void if the product is exposed to excess moisture.

CLEANING GUIDELINES

Prime and Bestwood Melamine Bestwood and Prime Melamine is low maintenance and easy to clean. Simply wipe down with a clean, damp cloth. Spills, slashes, stains and greasy fingerprints should be tackled early with warm water and detergent or a general-purpose spray and wipe cleaner.

Important: Always wipe with a damp cloth, then a dry cloth after cleaning to remove moisture. Never use abrasive cleaners or cleaning tools on Bestwood or Prime Melamine such as; Jif, Vim, Brasso, steel wool or abrasive sponges. We also recommend caution in using bleach and alcohol-based cleaners. Do not use citrus based cleaners as these may cause damage and leave a sticky residue on the surface

Veneers Due to the product requiring additional finishing that is added after production, please contact your Account Manager and discuss care and maintenance on veneers on a case by case basis.

ADDITIONAL NOTES

T&R recommends that if the seriousness of cleaning exceeds the guidelines above and requires further assistance, contact professional cleaning experts. Contact your T&R account manager for individual enquiries surrounding care and maintenance. Always read the directions listed on any cleaning products before use, and ensure rubber gloves and personal safety precautions are taken.
